S E R V I C E S

Our professional design, licensing, site, installation & maintenance, and rental services allow you to work with a single wireless partner from beginning to end. Our talented people will make your project run smoothly, and our services will enhance your wireless operation.

System (RF) Design

The System Design team includes experts in RF design, network design, IT integration, AutoCAD drafting, and technical writing. They provide services for a host of applications including:

Consoles
Digital Video Surveillance
MESH, Wi-Fi, and Mobile Data
Microwave & Wireless Ethernet
In Building (Signal Booster) Systems
Two-Way Radio & Paging

With services including:

Analysis, Audit and Testing
System Design
Propagation, Coverage and Path Profile
As-Built Documentation

FCC Licensing & Compliance

Our FCC Licensing team takes the complicated and confusing process of filing FCC licensing documents and makes it simple for you. Tracking the fast changing world of FCC Compliance takes focus and experience. We can help with:

2013 Narrowband Compliance
License Preparation and Tracking
FAA and Tower Registration
Spectrum Acquisition

Tower Site Services

Our Tower Sites & Services team handles site construction, installation, design, and management services. Day Wireless has the expertise that comes with being one of the largest tower operators in the USA. Services include:

Locate Your System on One of Our 140+ Sites
Professional Management Services for Your Tower Sites
Construction from Bare Ground to Complete Facilities

Rentals

When you have a short term need for radios, cell phones or satellite phones, go to the source you can depend on. Our Rental Account Reps have experience in countless applications and can provide the guidance to help your rental run smoothly. Our rentals team has:

Thousands of Radios, Sat Phones, and Cellular Units Available
Fast, Accurate Service
Knowledgeable Account Reps
Programs & Equipment Designed to Meet Your Exact Needs

Service Shops

Installation & Maintenance

Keep your system at peak performance with trained and certified technicians at your service, in the shop or at your site, available 24 hours a day. Day Wireless Systems is a Motorola Premier Service Partner, meaning we've demonstrated consistent capabilities in performance, personnel, and training, and provide the highest level of Motorola service. Services include:

Shop, Field, Tower, and Site Installation
Mobile Radio Installation
Service & Repair for all Major Brands
Maintenance Programs to Extend the Life of Your System
24/7 Emergency service

Field Services

Trained technicians can analyze and document your RF equipment:

RF Safety Report
Coverage Documentation
Interference Studies
System/Site Audits

Motorola Premier Service Partner (PSP) Certification

Day Wireless is a Motorola PSP, meaning we have the highest commitment and training to Motorola Products and standards. All Day Wireless Systems service locations are certified.

ETA (Electronics Technicians Association) Certified
Technicians and Shops
Millions Invested in Test Equipment
Millions Invested in Technical Training

TECHNOLOGIES

We solve productivity and safety problems, and reduce operating expenses by using wireless technology that we design and deploy.

Although we are proud to offer the best possible solution from a variety of world class vendors, we have the distinction and honor of being the largest Motorola Outlet in the USA as an Authorized Dealer, Manufacturer's Rep, Federal MR, Network Solutions Provider, Enterprise Mobility Partner, and Premier Service Provider.

Motorola Manufacturer's Rep (MR) Program – State & Local, Federal Government

Day Wireless Systems is an Authorized Motorola MR for State & Local, and Federal government sales. This program allows us to represent and sell equipment and services on Motorola's behalf, and allows customers to take advantage of contracted price agreements with the manufacturer. Motorola MR equipment includes, but is not limited to:

- Mobile and Portable P25 Radios – XTL/XTS Series 1500, 2500, 5000, APX Series
- Base Stations – Quantar, MTR 2000/3000
- Radio Systems – ASTRO Conventional, Single Site Trunking, Multi Site Digital Trunking
- Consoles – MCC7500, MCC5500, MIP5000
- Mobile Workstation – MW810
- In Vehicle Applications – License Plate Recognition, Digital Patroller Video DP2
- Interoperability Gateways - Motobridge

Two-Way Radio

Government agencies and industries have turned to two-way radio technology for years due to its reliability, durability, and low cost of ownership. Capabilities are more advanced than ever with millions every year invested on next generation systems. One such example is the Mototrbo Digital Radio platform by Motorola. Radio applications include:

- Local Coverage of Factory, Agriculture and Campus Applications
- Wide-Area Metro or Regional Coverage
- Statewide/Multi County Public Safety Communications Systems
- National/Global Site Connect Using IP Radio

In-Building Coverage

Receiving wireless signals from outside and distributing them inside buildings is increasingly important for public safety and general user access. 2009 Fire Code standards by the ICC and NFPA state that first responders shall have approved radio coverage within buildings. Designs can be done for:

- Single or Multiple Carrier Systems
- Channelized or Broadband Amplifier Systems
- Underground Parking to High-Rise
- Stadiums, Manufacturing Facilities, and Other Large Buildings

Broadband Connectivity

Networking with wireless technology can be done with great throughput, fast deployment and high security. Applications and technologies include:

- Point-to-Point/Multi-Point, WLAN, MESH, Wi-Fi
- Radio over IP
- Microwave and MPLS

IP Video

Video surveillance protects property and people. Applications today include:

- License Plate Recognition
- In-Vehicle Recording
- Campus Wide Monitoring

Related Technologies

Helping with your overall communications needs, there are important systems that can be added:

- Public Safety and Commercial Dispatch Consoles
- Fixed Data and SCADA Systems
- Wide Area Paging Systems

Mobility Solutions

Today's workforce is highly mobile. Productivity and security are vital concerns. Designing a solution uses a mixture of hardware, software, and network.

Mobile Devices – a large selection of equipment to meet your mobile needs:

PDA's, Smart Phones, Handheld Computers, Rugged Laptops and Terminals, Portable Printers, Barcode Scanners, Mobile Routers, Aircards

Mobile Software – the right application can solve productivity and safety problems, and lower costs:

Field Reporting, Asset Management, Wireless Time Cards, Fleet Tracking, Electronic Citations and Crash Reporting, Rapid Identification and Mobile Booking, Direct Store Delivery, Mobile VPN

Mobile Networks – different services, coverage, technologies, and bandwidth options:

Wi-Fi, Cellular, Private Radio, Satellite

UNLIMITED WIRELESS SOLUTIONS

A **City** was paying thousands each month to the local telecom company to lease DS3 lines for connecting outlying buildings.

Learn how a wireless **Point-to-Point Ethernet** solution saved the city nearly \$70,000 in its first year.

A **Manufacturing Company** had trouble communicating in such a noisy environment.

Learn how **Digital Radio** with clean, clear audio helped improve their response time and overall efficiency.

A **Utility** needed to upgrade their wireless network to deploy new applications and increase system capacity.

Learn how our **Microwave+MPLS** solutions are highly reliable with tremendous throughput.

A major **Trucking Company** was having trouble managing their large fleet of wireless devices.

Learn how our wireless **Mobility Account Managers** can help resolve billing issues, save money on equipment, and help with deployment, all at no charge.

A **Port** needed a better security solution for their personnel and equipment.

Learn how a **Digital Video Surveillance** solution can be quick to deploy, rugged, and effective.

A **Nursing Center** needed to give their workers mobile access to patient medical records.

Learn how our **WLAN** solution and mobility products can improve resident care and staff productivity.

A **Police Agency** wanted to increase officer safety and decrease dismissed traffic citations due to data errors.

Learn how an **E-Ticketing solution** can get your officers out of harm's way faster, and decrease your dismissed traffic citations by up to 30%.

A **Fire Department** needed a dual band radio solution in order to communicate with disparate agencies during incident response.

Learn more about **APX dual band P25 radios**.

CHOOSE DAY WIRELESS SYSTEMS

We know that our job is to serve you. Here are a few reasons why you should choose Day Wireless Systems to be your wireless provider.

Satisfaction Guarantee

We are sure you will be satisfied with your service, product or system. If you find within 30 days that it does not meet the promised specifications, we will replace it or refund your money.

100-Year Heritage

We trace our communications history back to the founding of Estacada Telephone in 1905. You can count on our stability.

Largest Motorola Outlet in the USA

Although we are proud to offer the best possible solution from a variety of world class vendors, we have the training and backing of the leader in wireless technology, Motorola.

Mission Statement

We are committed to providing cutting edge wireless technology to increase productivity and exceed the customer's expectations, thus creating financial growth for our customers, employees, and company.

You Are in Good Company

Our customers vary in size, but include the following:

-  • **57 Fortune 100 Companies**
-  • **150 School Districts**
-  • **124 Colleges & Universities**
-  • **600 Public Safety & State Agencies**
-  • **66 Federal Agencies**
-  • **148 Hospitals & Medical Centers**
