

We Rely on EWA

EWA makes wireless work for every American industry, every day. If you need wireless communications, you need EWA.

How EWA Can Make Wireless Work For You

Business and government rely on EWA for strong advocacy to protect their spectrum rights as well as exclusive and specialized services to maintain the integrity of their wireless communications systems.

EWA represents its members and drives national spectrum issues, telecommunications policy and related matters before the FCC and federal telecom agencies.

Ask about our business management services, designed to alleviate administrative burdens and give you actionable marketing intelligence:

- License management for all your radio licenses
- Market updates inform you about competition in your area
- License protection for customized notifications of spectrum activity in your market area
- Narrowband reports on organizations still operating at wide-band, creating sales lead opportunities
- Spectrum analysis for exclusive channels and opportunities to expand in your market

Kenwood and Motorola dealers: Your EWA membership is eligible for 100% co-op.

EWA membership is available to wireless sales and service providers, enterprise wireless users, manufacturers and wireless vendors.

Visit us at www.enterprisewireless.org or call 1-800-482-8282 to discuss your wireless communications requirements and membership.

EWA IS YOUR FIRST CHOICE FOR:

- Spectrum consulting for current systems and future expansion.
- FCC license preparation for business, industrial, commercial and public safety applications, so that your new systems, modifications and renewals are handled simply and professionally.
- Expert frequency selection and certification to optimize spectrum strategies and solutions. This is a valuable sales tool for complex, large-scale system deployments.
- Engineering analysis to use in your RFP process.
- Education on the latest regulatory, licensing and compliance issues.
- Promoting your capabilities to enterprise and public safety buyers through the on-line Wireless Solutions Center, which showcases leading vendor expertise and the latest products and services.
